unreturned equity value reserves of deceased members and equity value reserves of resigned members (forfeited equity value) before the effectivity of the amended Insurance Code with less than three (3) years of membership are transferred to general fund balance.

As required by the IC, this change in accounting policy will be applied prospectively. The Association adopted the accounting policy in 2017 since aforementioned actions required by the IC has to be performed including the validation of the delinquent and resigned members in 2016.

Fund Balance
Guaranty Fund Reserves
Guaranty fund reserves represent required fund amounting to P5.00 million, and every year thereafter increased by an amount equivalent to five percent (5%) of gross members' contribution and premium collections until its amount has reached twenty-five percent (25%) of the required net worth for existing domestic life insurance companies.

General Fund Balance
General fund balance account represents the free and unassigned surplus of the Association.

Funds Assigned for Members' Benefits
The account pertains to the amount appropriated for members' benefits such as community development, transformation and microenterprise projects.

Funds Assigned for Capacity Building
The account pertains to the amount appropriated for capacity building such as training of members and employees and investment in new systems.

Remeasurement Gain (Loss) on Retirement Asset
Remeasurement gain (loss) on retirement assets pertain to the accumulated actuarial gains and losses arising from experience and demographic assumptions of the defined benefit obligation and gain (loss) in the plan assets.

Fair Value Reserve on AFS Financial Assets
Fair value reserve on AFS financial assets pertain to the cumulative amount of gains and losses due to the revaluation of AFS financial assets.

Fair Value Reserve on HTM Investments to be Amortized in Profit or Loss
Fair value reserve on HTM investments pertain to the net unrealized gain (loss) of the investments reclassified from AFS financial assets to HTM investments at date of reclassification. This reserve is amortized to profit or loss with the unamortized premium or discount of the reclassified investments through the effective interest method.

Revenue Recognition
The Association recognizes revenue from contracts with customers when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Association expects to be entitled in exchange for those goods or services, excluding amounts collected on behalf of third parties.

The Association's revenue streams arising from insurance contracts falls under PFRS 4 while interest income falls under PFRS 9 and other income under PFRS 15.
Determining whether the Association is Acting as Principal or an Agent
The Association assesses its revenue arrangements against the following criteria to determine whether it is acting as a principal or an agent:

- whether the Association has primary responsibility for providing the services;
- whether the Association has discretion in establishing prices; and
- whether the Association bears the credit risk.

If the Association has determined it is acting as a principal, the Association recognizes revenue on gross basis with the amount remitted to the other party being accounted as part of cost and expenses. If the Association has determined it is acting as an agent, only the net amount retained is recognized as revenue.

The Association has determined that it is acting as principal in its revenue arrangements.

The following specific recognition criteria must be met before revenue is recognized:

**Members’ Contributions and Premiums**
Members’ contributions and premiums are recognized when due. The annual members’ contribution of two hundred forty pesos is for mandatory life insurance cover while premiums include the following:

- One peso weekly for every thousand pesos of loan availed for credit life;
- Ten pesos annually for every thousand pesos loan availed for mortgage redemption insurance;
- Two hundred forty pesos annually for life plus insurance plan cover; and
- Six hundred fifty pesos annually for life maximum insurance cover.

Members’ contributions and premiums ceded to reinsurers are recognized as expense when the policy becomes effective.

**Interest Income**
Interest income for all interest-bearing financial instruments is recognized in profit or loss using effective interest method.

**Dividend Income**
Dividend income is recognized when the shareholder’s right to receive payment is established.

**Gain on Sale of Investments**
This pertains to the amount in excess of the selling price against the carrying amount of the AFS financial assets in a sale transaction.

**Other Income**
Other income arises mainly from surcharge fees due to the early termination of the policy and recovery of marketing and selling expenses for Microhealth products which are recognized at point in time.
Claims, Benefits, and Expenses Recognition

Claims and Benefits
Claims consist of benefits and claims paid and unpaid to members, denied and resisted claims and incurred but not reported (IBNR) claims. Provision for IBNR is made for the cost of claims incurred as of each reporting date but not reported until after the reporting date based on the Association’s experience and historical data. Differences between the provision for outstanding claims at the reporting date and subsequent revisions and settlements are included in profit or loss of subsequent years. Death claims and surrenders are recorded on the basis of notifications received.

Other Direct Costs
Other direct costs pertain to all costs incurred by the Association that are directly related to the Association’s insurance business such as marketing expenses and fees paid for collection services.

General and Administrative Expenses
Expenses are recognized when the decrease in future economic benefits related to a decrease in an asset or increase of a liability has arisen that can be measured reliably. Expenses are recognized when incurred.

Interest Expense
Interest expense on accumulated equity value reserves of active members are recognized in the profit or loss when it accrues.

Employee Benefits
Short-term Employee Benefits
Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Association has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement Benefits
The Association’s net obligation in respect of the defined benefit plan is calculated by estimating the amount of the future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligation is performed on a periodic basis by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Association, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan.

Remeasurements of the retirement asset, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income. The Association determines the net interest expense (income) on the retirement asset for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the retirement asset, taking into account any changes in the retirement asset during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to the defined benefit plan are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss.
The Association recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Provisions and Contingencies
Provisions are recognized when the Association has a present legal or constructive obligation as a result of a past event when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Contingent liabilities are not recognized in the financial statements. These are disclosed in notes to the financial statements unless the probability of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but are disclosed in notes to the financial statements when an inflow of economic benefits is probable.

Related Party Transactions
Related party relationships exist when a party has the ability to control, directly, or indirectly through one or more intermediaries, the other party or exercise significant influence over the other party in making financial and operating decisions. Such relationship also exists between and/or among entities which are under common control with the reporting enterprise, or between and/or among the enterprise and its key management personnel, trustees, or its members.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

Events After the Reporting Date
Post year-end events that provide additional information about the Association’s assets, liabilities and fund balance at the reporting date (adjusting events) are reflected in the financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the financial statements when material.

Standards Issued but Not Yet Adopted
A number of new standards, amendments to standards and interpretation are effective for annual periods beginning after January 1, 2019. However, the Association has not applied the following new or amended standards and interpretation in preparing these financial statements. The Association is assessing the potential impact on those on its financial statements, and has yet to reasonably estimate the impacts, unless otherwise stated.

Effective January 1, 2019

- PFRS 16, Leases supersedes PAS 17, Leases and the related Philippine Interpretations. The new standard introduces a single lease accounting model for lessees under which all major leases are recognized on-balance sheet, removing the lease classification test. Lease accounting for lessors essentially remains unchanged except for a number of details including the application of the new lease definition, new sale-and-leaseback guidance, new sub-lease guidance and new disclosure requirements.

Practical expedients and targeted reliefs were introduced including an optional lessee exemption for short-term leases (leases with a term of 12 months or less) and low-value items, as well as the permission of portfolio-level accounting instead of applying the requirements to individual leases. New estimates and judgmental thresholds that affect the identification, classification and measurement of lease transactions, as well as requirements to reassess certain key estimates and judgments at each reporting date were also introduced.
PFRS 16 is effective for annual periods beginning on or after January 1, 2019 with several transition approaches and individual options and practical expedients that can be elected independently of each other. Earlier application is permitted for entities that apply PFRS 15 Revenue from Contracts with Customers at or before the date of initial application of PFRS 16.

**Philippine Interpretation IFRIC-23, Uncertainty over Income Tax Treatments** clarifies how to apply the recognition and measurement requirements in PAS 12, *Income Taxes* when there is uncertainty over income tax treatments. Under the interpretation, whether the amounts recorded in the financial statements will differ to that in the tax return, and whether the uncertainty is disclosed or reflected in the measurement, depends on whether it is probable that the tax authority will accept the Association’s chosen tax treatment. If it is not probable that the tax authority will accept the Association’s chosen tax treatment, the uncertainty is reflected using the measure that provides the better prediction of the resolution of the uncertainty - either the most likely amount or the expected value.

The interpretation also requires the reassessment of judgments and estimates applied if facts and circumstances change - e.g. as a result of examination or action by tax authorities, following changes in tax rules or when a tax authority’s right to challenge a treatment expires.

The interpretation is effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted. The interpretation can be initially applied retrospectively applying PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, if possible without the use of hindsight, or retrospectively with the cumulative effect recognized at the date of initial application without restating comparative information.

**Plan Amendment, Curtailment or Settlement (Amendments to PAS 19, Employee Benefits)**. The amendments clarify that on amendment, curtailment or settlement of a defined benefit plan, an entity now uses updated actuarial assumptions to determine its current service cost and net interest for the period. The effect of the asset ceiling is disregarded when calculating the gain or loss on any settlement of the plan and is dealt with separately in other comprehensive income.

The amendments apply for plan amendments, curtailments or settlements that occur on or after the beginning of the first annual reporting period that begins on or after January 1, 2019. Earlier application is permitted.

**Annual Improvements to PFRSs 2015 - 2017 Cycle**. This cycle of improvements contains amendments includes:

- Income tax consequences of payments on financial instruments classified as equity (Amendments to PAS 12). The amendments clarify that all income tax consequences of dividends, including payments on financial instruments classified as equity, are recognized consistently with the transactions that generated the distributable profits, i.e. in profit or loss, other comprehensive income or equity.

The amendments are effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted. When an entity first applies those amendments, it shall apply them to the income tax consequences of dividends recognized on or after the beginning of the earliest comparative period.
Effective January 1, 2020

  
  - a new chapter on measurement;
  - guidance on reporting financial performance;
  - improved definitions of an asset and a liability, and guidance supporting these definitions; and
  - clarifications in important areas, such as the roles of stewardship, prudence and measurement uncertainty in financial reporting.

Some standards, their accompanying documents and PFRS practice statements contain references to, or quotations from, the International Accounting Standards Committee (IASC)'s Framework for the Preparation and Presentation of Financial Statements adopted by the IASB in 2001 or the Conceptual Framework for Financial Reporting issued in 2010. The amendments update some of those references and quotations so that they refer to the 2018 Conceptual Framework, and makes other amendments to clarify which version of the Conceptual Framework is referred to in particular documents.

These amendments are effective for annual reporting periods beginning on or after January 1, 2020.

- Definition of Material (Amendments to PAS 1, Presentation of Financial Statements and PAS 8). The amendments refine the definition of material. The amended definition of material states that information is material if omitting, misstating or obscuring it could reasonably be expected to influence the decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity. The amendments clarify the definition of material and its application by:

  (a) raising the threshold at which information becomes material by replacing the term 'could influence' with 'could reasonably be expected to influence';

  (b) including the concept of 'obscuring information' alongside the concept of 'omitting' and 'misstating' information in the definition;

  (c) clarifying that the users to which the definition refers are the primary users of general purpose financial statements referred to in the Conceptual Framework;

  (d) clarifying the explanatory paragraphs accompanying the definition; and

  (e) aligning the wording of the definition of material across PFRS and other publications.

The amendments are expected to help entities make better materiality judgments without substantively changing existing requirements.

The amendments apply prospectively for annual periods beginning on or after January 1, 2020. Earlier application is permitted.
Effective January 1, 2022

- PFRS 9, Financial Instruments (2014). PFRS 9 (2014) replaces PAS 39 and supersedes the previously published versions of PFRS 9 that introduced new classifications and measurement requirements (in 2009 and 2010) and a new hedge accounting model (in 2013). PFRS 9 includes revised guidance on the classification and measurement of financial assets, including a new expected credit loss model for calculating impairment, guidance on own credit risk on financial liabilities measured at fair value and supplements the new general hedge accounting requirements published in 2013. PFRS 9 incorporates new hedge accounting requirements that represent a major overhaul of hedge accounting and introduces significant improvements by aligning the accounting more closely with risk management.

Effective January 1, 2023

- PFRS 17, Insurance Contracts. The replaces the interim standard, PFRS 4. Reflecting the view that an insurance contract combines features of both a financial instrument and a service contract, and considering the fact that many insurance contracts generate cash flows with substantial variability over a long period, PFRS 17 introduces a new approach that:

  (a) combines current measurement of the future cash flows with the recognition of profit over the period services are provided under the contract;

  (b) presents insurance service results (including presentation of insurance revenue) separately from insurance finance income or expenses; and

  (c) requires an entity to make an accounting policy choice portfolio-by-portfolio of whether to recognize all insurance finance income or expenses for the reporting period in profit or loss or to recognize some of that income or expenses in other comprehensive income.

Under PFRS 17, groups of insurance contracts are measured based on fulfilment cash flows, which represent the risk-adjusted present value of the entity’s rights and obligations to the policy holders, and a contractual service margin, which represents the unearned profit the entity will recognize as it provides services over the coverage period. Subsequent to initial recognition, the liability of a group of insurance contracts represents the liability for remaining coverage and the liability for incurred claims, with the fulfilment cash flows remeasured at each reporting date to reflect current estimates.

Simplifications or modifications to the general measurement model apply to groups of insurance contracts measured using the ‘premium allocation approach’, investment contracts with discretionary participation features, and reinsurance contracts held.

PFRS 17 brings greater comparability and transparency about the profitability of new and in-force business and gives users of financial statements more insight into an insurer’s financial health. Separate presentation of underwriting and financial results will give added transparency about the sources of profits and quality of earnings.
PFRS 17 is effective for annual periods beginning on or after January 1, 2023. Full retrospective application is required, unless it is impracticable, in which case the entity chooses to apply the modified retrospective approach or the fair value approach. However, if the entity cannot obtain reasonable and supportable information necessary to apply the modified retrospective approach, then it applies the fair value approach. Early application is permitted for entities that apply PFRS 9 and PFRS 15 on or before the date of initial application of PFRS 17.

4. Significant Accounting Judgments and Estimates

The Association makes judgment and key estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amount recognized in the financial statements are as follows:

Judgment

a) Classification of Financial Instruments

The Association exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as a financial asset, financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial asset or liability. The substance of a financial instrument, rather than its legal form, governs its classification in the statements of assets, liabilities and fund balance. In addition, the Association classifies assets by evaluating among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether the quoted prices are readily and regularly available and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

As at December 31, 2018 and 2017, the Association's financial instruments are classified as loans and receivables, HTM investments, AFS financial assets and other financial liabilities.

b) Determination of Fair Value of Financial Instruments

The fair value of financial instruments traded in active markets is based on quoted market prices or quoted prices for similar assets or liabilities at the reporting date. If the financial instrument is not traded in an active market, the fair value is determined using valuation techniques. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by management. All models are certified before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair values of financial instruments.

As at December 31, 2018 and 2017, the Association's financial instruments carried at fair value are classified as Level 1 in the fair value hierarchy (see Note 6).
Estimates
Impairment of Financial Assets
(a) Financial Assets at Amortized Cost
The Association reviews its receivables to assess impairment at least on an annual basis, or as the need arises due to significant movements on certain accounts. Receivables that are individually significant are assessed to determine whether objective evidence of impairment exists on an individual basis, while those that are not individually significant are assessed for objective evidence of impairment either on an individual or on collective basis. In determining whether an impairment loss should be recorded in the profit or loss, the Association makes judgment as to whether there are any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of receivables before the decrease can be identified with an individual receivable in that portfolio.

If there is an objective evidence that an impairment loss on receivables has been incurred, the amount of loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows (excluding future credit losses) discounted at the financial asset’s original EIR (i.e., the EIR computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The amount of loss shall be recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in profit or loss, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

There was no impairment loss on financial assets at amortized cost were recognized in 2018 and 2017.

(b) AFS Financial Assets
The Association considers that investments are impaired when there has been a significant or prolonged decline in the fair value below their cost. The Association evaluates among other factors, the normal volatility in share/market price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

As at December 31, 2018 and 2017, the carrying amount of AFS financial assets amounted to P796.72 million and P751.17 million, respectively (see Note 10). There was no impairment loss recognized in 2018 and 2017 on the Association’s AFS financial assets.

(c) Determining Fair Value of Investment Property
The fair value of the investment property is based on its selling price on the date of acquisition. The selling price was used as the basis for the fair value measurement after consideration of the market participants’ ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

As at December 31, 2018, the carrying amount of the investment property amounted to P56.00 million (see Note 13). No impairment losses have been recognized on the Association's investment property for the year ended December 31, 2018.
(d) **Liabilities Arising from Claims made under Insurance Contracts**

The ultimate liability arising from claims made under insurance contracts is the Association’s most critical accounting estimate. There are several sources of uncertainty that need to be considered in the estimation of the liability that the Association will ultimately pay for such claims. The major sources of uncertainties are the frequency of claims due to contingencies covered and the timing of benefit payments.

Claims estimation by the Association considers many factors such as industry average mortality or morbidity experience, with adjustments to reflect the Association’s historical experience. These liabilities form part of the Association’s IBNR which amounted to P3.50 million and P4.52 million as at December 31, 2018 and 2017, respectively (see Note 15).

(e) **Liability Adequacy Test**

At each reporting period, the Association ensures that the assumptions used are best estimates, taking into consideration the current experience to determine whether liabilities are adequate in accordance with the provisions of PFRS 4.

In 2017, the Association did not issue insurance policies with coverage period of more than one year. While in 2018, the Association issued Golden Life Insurance Plan (GLIP) which has a policy term of more than one year. As at December 31, 2018, the aggregate set up for GLIP is adequate using the best estimate assumptions.

(f) **Estimating Aggregate Reserves**

The Association estimates the aggregate reserves for future contractual obligations for contributions paid by determining the forty percent (40%) of the unexpired portion of the member contributions collected each month on per week, month, quarter, semi-annual and annual basis. For premium, credit life and other optional products eighty percent (80%) of the unexpired portion is set-up. The assumption is based on a number of factors determined by an actuary including the unearned premium factor.

As at December 31, 2018 and 2017, aggregate reserves amounted to P53.54 million and P54.79 million, respectively (see Note 16).

(g) **Estimating Retirement Benefits**

The determination of the obligation and cost of retirement benefits is dependent on the selection of certain assumptions used by the actuary in calculating such amounts. Those assumptions include, among others, discount rates, expected returns on plan assets and salary increase rates.

While the Association believes that the assumptions are reasonable and appropriate, significant differences between actual experience and assumptions may materially affect the cost of employee benefits and related obligations.

As at December 31, 2018 and 2017, the Association has a retirement asset of P3.08 million and P2.13 million, respectively (see Note 20).

Retirement expense amounted to P0.65 million in 2018 and P0.46 million in 2017 while remeasurement gain (loss) on retirement asset amounted to P0.19 million and (P1.40) million as at December 31, 2018 and 2017, respectively (see Note 20).
(h) **Provisions and Contingencies**

The Association, in the ordinary course of business, sets up appropriate provisions for its present legal or constructive obligations, if any, in accordance with its policies on provisions and contingencies. In recognizing and measuring provisions, management takes risk and uncertainties into account.

The Association is under an ongoing tax review for taxable year 2016. However, management believes that as of date it is not probable that an outflow of resources will be required given that there is no result of the tax review yet.

---

5. **Management of Insurance and Financial Risks**

The Association’s activities expose it to a variety of risks such as financial and insurance risks. The overall objective of risk management is to focus on the unpredictability of financial and insurance contingencies to minimize potential adverse effects on the financial condition of the Association.

**Governance**

The BOT of the Association has overall responsibility for the establishment and oversight of the Association’s risk management framework. The BOT has delegated to the management the responsibility of developing and monitoring the Association’s risk management policies.

The Association’s risk management policies are established to identify and analyze the risks faced by the Association, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Association’s activities. The Association, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

Management is responsible for monitoring compliance with the risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Association.

**Regulatory Framework**

Regulators are interested in protecting the rights of the members and maintain close observation to ensure that the Association is satisfactorily managing its affairs for the benefit of members. At the same time, the regulators are also interested in ensuring that the Association maintains appropriate solvency position to meet liabilities arising from claims and that the risks are at acceptable levels.

The operations of the Association are subject to the regulatory requirements of the IC. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions [e.g. net worth requirements and risk-based capital (RBC) requirements].

Such restrictive provisions minimize the risk of default and insolvency on the part of the insurance companies to meet the unforeseen liabilities as these arise.
Capital Management
The Association’s objective in managing fund balance is to maintain high growth by applying free cash flow to selective investments that would preclude the Association’s need of additional financing. The Association sets strategies with the objective of establishing a versatile and resourceful financial management and fund balance structure. Management has overall responsibility for monitoring of fund balance in proportion to risk. Profiles for ratios are set in the light of changes in the Association’s external environment and the risks underlying the Association’s business operations and industry.

The Association’s capital includes guaranty fund reserves, general fund balance, funds assigned for members’ benefits and for capacity building.

The Association monitors fund balance on the basis of the debt-to-equity ratio which is calculated as total debt divided by total fund balance. Total debt is equivalent to claims payable, accrued expenses and other liabilities, due to related party, aggregate reserves and equity value reserves. Total equity comprises the fund balance.

Debt-to-equity ratio as at December 31 is as follows:

<table>
<thead>
<tr>
<th></th>
<th>2018</th>
<th>2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total debt</td>
<td>P329,493,619</td>
<td>P276,051,518</td>
</tr>
<tr>
<td>Total equity</td>
<td>740,030,444</td>
<td>732,215,674</td>
</tr>
<tr>
<td>Debt-to-equity ratio</td>
<td>44.52%</td>
<td>37.70%</td>
</tr>
</tbody>
</table>

There were no changes in the Association’s approach to fund balance management during the year.

The Association is subject to imposed capital requirements set by IC. Compliance with these requirements is discussed below.

Net Worth Requirement
Under the Insurance Code, mutual benefit associations must have available total member’s equity in an amount to be determined by the IC above all liabilities for losses reported as net worth requirement.

As at December 31, 2018 and 2017, the Association is compliant with the required net worth requirement based on the Association’s calculations. However, the final amount of the net worth requirement can be determined only after the accounts of the Association have been examined by the IC, specifically as to admitted and non-admitted assets as defined in the Insurance Code.

The estimated amounts of non-admitted assets as defined in the Insurance Code included in the Association’s statements of assets, liabilities and fund balance, which are subject to final determination by the IC are as follows:

<table>
